

Login Page Requirements Specification

REQ-001 — Login Page Availability

The system shall provide a Login page for user authentication - <https://www.saucedemo.com/>

REQ-002 — Login Page Elements

The Login page shall contain the following UI elements:

- Username input field
- Password input field
- Login button
- Accepted usernames section
- Password information section

REQ-003 — Username Field

The Username field shall:

- be visible
- be editable
- accept text input
- display the placeholder text `Username`

REQ-004 — Password Field

The Password field shall:

- be visible
- be editable
- accept text input
- mask entered characters
- display the placeholder text `Password`

REQ-005 — Login Button

The Login button shall:

- be visible
- be enabled by default
- be clickable

REQ-006 — Accepted Usernames Display

The system shall display the following accepted usernames on the Login page:

- `standard_user`

- locked_out_user
- problem_user
- performance_glitch_user
- error_user
- visual_user

REQ-007 — Common Password Display

The system shall display the common password for all users:

`secret_sauce`

REQ-008 — Successful Authentication

If a user enters:

- a valid username from the accepted usernames list
- the correct password `secret_sauce`

the system shall authenticate the user successfully.

REQ-009 — Redirect After Successful Login

After successful authentication,
the system shall redirect the user to the Inventory Page.

REQ-010 — Empty Username Validation

If the Username field is empty
and the user attempts to log in,
the system shall reject authentication
and display an error message.

REQ-011 — Empty Password Validation

If the Password field is empty
and the user attempts to log in,
the system shall reject authentication
and display an error message.

REQ-012 — Empty Fields Validation

If both Username and Password fields are empty
and the user attempts to log in,
the system shall reject authentication
and display an error message.

REQ-013 — Invalid Username Validation

If the entered username does not exist in the accepted usernames list, the system shall reject authentication and display an error message.

REQ-014 — Invalid Password Validation

If the username is valid but the password is incorrect, the system shall reject authentication and display an error message.

REQ-015 — Locked Out User Restriction

If the user enters:

- username: `locked_out_user`
- password: `secret_sauce`

the system shall deny access to the application.

REQ-016 — Locked Out User Error Message

For the `locked_out_user`, the system shall display a message indicating that the user is locked out.

REQ-017 — Enter Key Behavior

Pressing the Enter key from the login form shall trigger authentication the same way as clicking the Login button.

REQ-018 — Error Message Visibility

All validation and authentication error messages shall be clearly visible to the user.

REQ-019 — Failed Login Data Persistence

After a failed login attempt,
the system shall preserve entered values
unless explicitly defined otherwise.

REQ-020 — Cross-Browser Compatibility

The Login page shall work correctly in:

- Google Chrome
- Mozilla Firefox
- Microsoft Edge

REQ-021 — Performance Requirement

The system shall process login requests
within acceptable user experience limits
(for example, within 3 seconds under normal conditions).
